

**To:** Eclipse BD Customers

**Date:** March 24, 2008

**Subject:** EclipseSuite 6.0 Beta Z17 Pre-Release

**Description:**

This document is to notify all customers running EclipseSuite for the High Definition formats that **EclipseSuite 6.0 Beta Z17** was released to a few customers. [This beta software has not been tested and is being made available as-is.](#) The purpose of this early release is to fix a problem related to the conversion of Sony CMF images to BDCMF that exists in ImageCopy 6.0 Beta Z16. Please review the following list of changes to determine if any are applicable to your needs. Once this version is tested, a new notification will be sent for general release.

**This version is required when converting Sony CMF images to BDCMF using ImageCopy. If you are not processing Sony CMF images, you do not need to install this version of EclipseSuite.**

**Fixes & Enhancements:**

- **Output BDCMF version 0.90 when converting a Sony CMF image to BDCMF.**  
When converting a Sony CMF image to BDCMF, ImageCopy 6.0 Beta Z16 was generating BDCMF version 0.99. Since this version of BDCMF is not yet unreleased, ImageCopy 6.0 Beta Z17 reverts back to BDCMF 0.90.

**Download Instructions:**

You can download the EclipseSuite 6.0 Beta Z17 from the following links:
