Date: April 1, 2008

Subject: EclipseSuite 6.0 Beta Z18 Pre-Release

Description:

This document is to notify all customers running EclipseSuite for High Definition formats that **EclipseSuite 6.0 Beta Z18** was released to specific customers for testing. [This beta software was not thoroughly tested at Eclipse and was made available as-is.](#) The purpose of this early release was to fix a problem with the optional Royalty Reporting module*. On completion of testing, this fix will be made available in a general release.

Fixes & Enhancements:

- Fix for BD and HD Royalty Report* issues where certain video streams were shown as having abnormally long codec times.

Download Instructions:

This version does not contain changes to the analysis engine. Is it not available for general download.

* Royalty Reporting Option requires dongle activation
