Subject: EclipseSuite 6.0 Beta Z19 & Z20 Pre-Release

Description:

This document is to notify all customers running EclipseSuite for the High Definition formats that **EclipseSuite 6.0 Beta Z19 & Z20** were released to specific customers for testing. [This beta software was not thoroughly tested at Eclipse and was made available as-is.](#) The purpose of these early releases is to fix the problems listed below. Once these versions are tested, a new notification will be sent for general release.

Fixes:

- Fixed Royalty Report issue where certain video streams were shown as having abnormally long coded times. This has been corrected in 6.0 Beta Z19.
- Fixed a problem where certain problem images were causing the EclipseSuite programs to generate too many debug message which eventually caused the programs to crash. It was determined that certain debug messages are no longer necessary and have been omitted in 6.0 Beta Z20.
