

Eclipse Releases Recordable Media Option for ImageEncoder

June 26, 2001

Eclipse, the new leader in DVD and CD mastering encoders and software announced the availability of a recordable media option for the Eclipse ImageEncoder. This new feature expands the already feature-rich Eclipse ImageEncoder with the capability to encode any of the major recordable formats, including CD-R, CD-RW, DVD-R, DVD-RW, DVD+RW and DVD-RAM. Customers may choose to purchase any specific format or all formats, depending on their individual needs.

The new recordable media option can be easily added to the ImageEncoder for seamless, user-friendly operation incorporating Eclipse's standard user-interface screens. In addition, the new option is fully compatible with ImageEncoder's job scheduler feature providing users with the flexibility of scheduling both recordable and standard mastering jobs in the same queue for uninterrupted operation.

Eclipse has built a reputation for technical excellence and world-class customer support with its line of mastering, premastering and QC verification tools for the DVD and CD manufacturing industry.
