

Eclipse Announces Support for Macrovision's SafeAudio™ Music CD Copy Protection System

June 26, 2001

REPLitech EUROPE - GENEVA, Switzerland - Eclipse, the new leader in DVD and CD mastering software and hardware systems announced the release of a new plug-in module for ImageEncoder systems for mastering Macrovision's new SafeAudio music CD copy protection software. SafeAudio is a secure audio copy protection solution, jointly developed by Macrovision and TTR Technologies, Inc. (Nasdaq: TTRE).

Macrovision Corporation of Sunnyvale, California (NASDAQ: MVSN), the world leader in video and software copy protection and digital rights management technologies, has released SafeAudio, its new CD audio copy protection software. Brian McPhail, Vice President and General Manager of the Consumer Software Division of Macrovision, noted, "SafeAudio provides content owners with an easy to implement copy protection solution for CD audio discs that provides effective protection against unauthorized copying. To ensure a smooth implementation of the copy protection for replicators, Macrovision has worked closely with Eclipse to develop the tools necessary for mastering SafeAudio encrypted discs." CD replicators interested in learning more about, or becoming authorized resellers of SafeAudio, should contact Macrovision directly at REPLitech Europe - Stand 2418 or www.macrovision.com.

In support of Macrovision's SAFEAUDIO copy protection software, Eclipse offers an optional plug-in module for the ImageEncoder System. This plug-in module supports SafeAudio mastering from either hard disc drive or a network. "Because Eclipse worked closely with Macrovision during the development of SafeAudio, Eclipse is able to provide customers with the mastering tools necessary to implement SafeAudio on their mastering systems immediately," said Bob Edmonds, Vice President of Sales & Marketing for Eclipse. The SafeAudio plug-in is available for purchase from Eclipse and can be added to existing ImageEncoders in the field remotely.

Eclipse, recognized as the new leader in DVD and CD mastering encoders and software provides leading edge capability with a reputation for technical excellence and world-class customer support in its line of mastering, premastering and QC verification tools for the DVD and CD manufacturing industry. Macrovision (www.macrovision.com) develops and markets digital rights management, electronic license management and copy protection technologies for the consumer interactive software, enterprise software, home video and music markets.

Macrovision's SafeAudio is 100% software-based audio copy protection solution for music CDs, with an "authentication" option for PC and Internet applications. Its SafeCast™ product is a comprehensive digital rights management (DRM) and security solution for a variety of application, content, and entertainment products, and includes a wide range of tools that help publishers distribute and perform transactions over the Internet using either CD-ROM or electronic software distribution (ESD) and electronic license distribution (ELD) technology. Its SafeDisc® CD-ROM copy protection solution has been licensed to over 100 mastering and replication facilities worldwide and has been used on over 75 million discs by major interactive software publishers. Its SafeWrap™ product provides tamper-proofing for digital properties, including Internet music applications.

Macrovision, SafeAudio, SafeCast, SafeDisc and SafeWrap are registered trademarks or trademarks of Macrovision Corporation.
