

Which CD-R & CDRW Write Speeds are Supported?

As new models of CR-R and CDRW writers become available, some of the existing write speeds are no longer supported. When an unsupported speed is selected by the software, the drives do not return an error, but rather they simply step down to the next lower available speed. Below is a list of supported speeds:

CDR	1x	2x	4x	6x	8x	12x
Yamaha 6416	Yes	-	Yes	Yes	-	-
Yamaha 8424	*	*	Yes	*	Yes	*
Plextor 820	Yes	Yes	Yes	-	Yes	-
Plextor 8220	Yes	Yes	Yes	-	Yes	-
Plextor 12432	Yes	Yes	Yes	-	Yes	Yes
CDRW						
Yamaha 6416	-	Yes	Yes	-	-	-
Yamaha 8424	*	*	Yes	*	*	*
Plextor 820	-	-	-	-	-	-
Plextor 8220	-	Yes	-	-	-	-
Plextor 12432	-	-	Yes	-	-	-

* Yamaha 8424 untested at these speeds

- unsupported speed

Also, see the [supported peripheral matrix](#) to determine which revision of software supports which drives.
