Simple Solutions to Complex Problems

Authoring

ImageSend	Simplify the electronic submission of masters to replication plants
ImageCopy	Create DDP; copy, analyze, and repair masters
ImageMapper	Play or access DDP & CMF masters as if they were replicas
AudioViewer	View and play audio masters; see track changes, index points
ImageIntegrity	Add Eclipse checksums and signatures to protect masters through the replication process
ImageAnalysis	Analyze masters for format compliance before sending to replication
ImageSignature NEW!	Track and verify images as they move through the disc manufacturing process

Premastering

EclipseSuite CD/DVD	Professional-grade premastering analyzes, copies and verifies CD and DVD images
EclipseSuite HD & BD NEW!	Next generation premastering software supporting Blu-ray and HD DVD. Support AACS encryption and decryption
ImageAnalysis	Analyze masters for format compliance with more than 1000 user configurable rules
ImageCopy	Analyze and repair images while copying to mastering server
ImageMapper	Play or access DDP & CMF DLTs or files to isolate playability problems
ImageArchive	Create archival DVD+R discs from tape or file while copying to the mastering server
ImageIntegrity	Add auto-verify and checksums to protect images through the replication process
ImageSignature NEW!	Track and verify images as they move through the disc manufacturing process

Mastering

ESP 7000	Next generation All-In-One encoder ▶3X HD/BD, 8R DVD

	▶Advanced Pulse Shaping ▶All HD/BD/DVD/CD recordable formats ▶CAV & CLV mastering
ImageDecoder	Automatically capture, analyze, and bit-to-bit verify EFM signals from any LBR
ImageNet	Software-based high speed mastering network and scheduler
ImageCopy	Analyze and repair images while copying to mastering server
ImageIntegrity	Protect your data through every step of the process, from customer master to replica

Quality Control

ImageDecoder	Automatically capture, analyze, and bit-to-bit verify replicas against original source or mastering server image
ImageVerify	Analyze and bit-to-bit verify replicas against original source or mastering server image
ImageIntegrity	Verify replicas even though original source is not available
ImageSignature NEW!	Track and verify images as they move through the disc manufacturing process
